3DAAA Victorian Range Setters Report June 2019 - May 2020

Firstly a Thank you to Twin City Archers for hosting the event

We were all set for 2020.

The clubs completed their Range Setters Course in February 2020.

Congratulations to the Following:

LEVEL 2 Range Setters

Mornington Peninsula Bowmen

Neil Morris, Bridget Morris and Trudy Scott

Twin City Archers

Brett Carn, Paul Eagle, Will Ellen & Peter Bennett

We had the opportunity to combine some very experienced Range Setters with some new ones in this course.

In doing the final practical, working with the group and their experience levels it was decided that the ones with experience set up a range of targets with purposefully built in problems.

The object the new ones were to examine the range and find where the errors were, and then advise how they would correct them in accordance with the training they had just received.

It was a good learning exercise for all involved, and created much positive discussion about the course, and questions in the tests as to how it aligned with the practical tests they went through.

A special mention in this section goes to Peter Dixon, who while no longer on our official Range Setters list – contributes and trains their club members with all the experience he has gained over the number of years he has set up ranges for 3D AAA.

As a presenter with Brett at this training, I still learn a lot from those attending reviewing the course setters program and look forward to the next ones.

Bring on 2021.

Regards

Cordell McGuire
